PROFESSIONAL SUMMARY

Frontend Developer with 7+ years of experience designing and building modern, high-performance, user-centered web applications. Specialized in Vue.js, Nuxt.js and TypeScript, with full-stack experience in React/Next.js and Python/FastAPI backends. Project experience for UN agencies (UNAIDS, UNFPA, IOM, IFAD), EBU Eurovision, AdTech (UTIQ), aerospace/logistics (Altec), industry, NGOs and startups. Strong focus on code quality, accessibility, performance optimization and design system implementation. Experienced in collaborating with designers and backend teams to deliver fluid, scalable and responsive interfaces.

WORK EXPERIENCE

Frontend Developer / Web Engineer — Enterprise Projects

Jun 2025 – Present

Employer: Dacomat S.r.l. — Delivery partner: Reply S.p.A.

- Development for enterprise clients in the aerospace/logistics (Altec), industrial (Ferwood) and energy (Eni) sectors.

LISUP (Altec) — web-based logistics / warehouse management system (Vue 3, PrimeVue 4, TypeScript, Tailwind):

- Interactive dashboards and data management interfaces for logistics modules (IWM, spare parts, shipments, inbound/outbound inspections, TRF)
- Dynamic tables with filtering, pagination and optimized sorting
- File import/export flows and handling of large data volumes
- SSO authentication with Keycloak, internationalization (vue-i18n) and real-time updates via WebSocket (STOMP/SockJS)
- Performance optimization (lazy loading, code splitting, reusable components); testing with Vitest and Cypress, code quality with SonarQube

Ferwood — e-commerce platform for refurbished industrial machinery (replacing the legacy Magento/Elasticsearch stack):

- New multi-market public website (Next.js 16, React 19, TypeScript, Tailwind): catalog with data-driven filters from OpenSearch, i18n across 10+ languages (next-intl), SEO overhaul (metadata, JSON-LD, hreflang, 301 redirects + proxy for legacy URLs), Contentful CMS, authentication and wishlist
- Custom backend API (FastAPI, Python 3.13): Redshift-to-OpenSearch reindexing pipeline, catalog/search and recommendation APIs, write integration with Dynamics CRM, transactional emails (AWS SES / Microsoft 365)
- Deployment on AWS ECS Fargate behind ALB via CodePipeline, Docker builds with test gates, automated reindexing via EventBridge Scheduler
- Internal tools (Next.js, React, PrimeReact) replacing legacy Excel pricing tools ("Prova Prezzi" price calculator, unified price list)

Eni:

- Bug fixing and maintenance of data management interfaces

Frontend Developer

Sep 2023 – Jun 2024

Elkanodata — Remote, Spain

- Worked alongside two senior frontend developers on projects for enterprise clients
- UN agencies: UNAIDS (Let Communities Lead, GCAI), UNFPA (Equity 2030, UHC Assessment Tool), IOM Climate-Related Migration, IFAD RIDE 2023, Peace Begins With Me
- Other clients: EBU Eurovision News (newsroom microsite), Covenant House (WordPress CMS integration into an existing vanilla frontend)
- Stack: Nuxt 3, Vue 3, TypeScript, Prismic CMS, WordPress, D3.js, GSAP, Lenis, Swiper, Webpack, Vite

Frontend Developer

Aug 2022 – Sep 2023

Teavaro — Remote, United Kingdom

- UTIQ — corporate marketing website (Vue.js + TypeScript) supporting the rebrand from TrustPid to UTIQ and expansion into European markets
- Maintenance and development of the admin platform for user and data management
- Migration from JavaScript to TypeScript for greater stability
- Implementation of reusable Vue components and automated tests
- Collaboration with the backend team on API optimization and caching

Frontend Developer (Freelance, part-time)

Nov 2022 – Jul 2023

JADE Solutions — Remote, Cuba

- Luna Tour — Vue 3 + Vite SPA for discovering tourist destinations (multilingual, mobile-first, WhatsApp handoff)
- CMS pages, SEO optimization and Google OAuth integration
- Mobile layouts with Ionic and Capacitor
- E-commerce admin panels

Full Stack Developer

Sep 2019 – Aug 2022

ONAT — Hybrid, Cuba

- Full-stack developer on internal administrative systems for Cuba's National Tax Administration Office (ONAT)
- Built and maintained a reusable Vue component library shared across multiple administrative modules
- Backend development and database modeling with Django, exposing REST and GraphQL APIs
- Client-side API integration with caching and rendering optimization
- UX iteration based on direct feedback from internal operations teams
- Three-year tenure with growing responsibility over broader areas and features

Full Stack Developer

Aug 2019 – Sep 2020

El Catre — Remote, Cuba

- Built the frontend of Cuba's first independent e-commerce platform: Nuxt 2 + Vue 2 + Vuex + Buefy on an Apollo GraphQL client
- Seller storefronts, product catalog, cart, checkout and seller analytics dashboards with ApexCharts
- Real-time chat and notifications via WebSocket with Django Channels + Redis
- Federated authentication: Firebase phone verification, Facebook/Google OAuth, JWT
- PWA and SSR optimization tuned for Cuban network conditions; image cropping and QR code generation
- Backend support with Django + Graphene (GraphQL): database modeling and API endpoints

FREELANCE PROJECTS

ZenO — Website improvements and email integration

2026

- Responsiveness improvements, DNS configuration and redirects
- Resend integration for sending client questionnaires and newsletter sign-ups

Casa in Ordine

2025 – 2026

- Multilingual website (IT/EN/ES) for a Rome-based home organizing business
- Next.js 16 + React 19 + Tailwind v4, with a 9-step quote wizard
- Brevo email integration, Umami analytics, GDPR cookie consent

FreeMock

2025 – Present

- Meme creator and social platform with web3 wallet authentication (Reown AppKit)
- Nuxt 3 + Pinia + shadcn-vue + Fabric.js editor + WebSocket chat with Signal protocol
- Image rendering microservice in Go + govips; CI/CD with SonarQube and Codecov

BattleBucks — Play-to-Earn on Solana

2025

- Real-money battle royale and 1v1 PvP game on Solana, shipped as a PWA and native iOS/Android app
- Nuxt 3 + Pinia + Reown AppKit for Solana wallet connection and SIWX authentication
- Custom WebSocket store for real-time gameplay flow and chat with reconnection logic
- Capacitor for native iOS/Android builds from a single Nuxt codebase; Sentry for observability

Cubita Producciones	2025
• Trilingual website (ES/EN/IT) for a Cuban talent agency, with artist catalog and booking flow • Next.js 16 + App Router + Tailwind v4 + next-intl + Framer Motion • Strapi v5 CMS set up for a future editorial handover	
Gitfast	2024
• Freelance collaboration with a client in Mexico • New features and a reusable UI component library • Performance optimization and frontend refactoring for scalability and readability	

EDUCATION

B.Sc. in Computer Science	2013 – 2019
<i>Universidad de las Ciencias Informáticas (UCI), Cuba</i>	
• Specialization in Java and object-oriented programming • Participation in the ACM-ICPC programming contest • Thesis: development of a CAD system with C++ and Qt	

TECHNICAL SKILLS

Core stack: Vue 3, Nuxt 3, TypeScript, Tailwind CSS, PrimeVue, Pinia, REST APIs, Git

Advanced: React, Next.js, JavaScript (ES6+), Python, Sass, Vitest, Jest, Cypress, Vite, Webpack, Docker, PWA, SEO, Figma, WordPress, Astro, GSAP, Framer Motion, Canvas/SVG animations

Working knowledge: FastAPI, AWS (ECS/Fargate, OpenSearch, Redshift, SES), PostgreSQL, Contentful, Keycloak, WebSocket (STOMP/SockJS), next-intl, Go, Django, GraphQL, Solana/Web3, Reown AppKit, Firebase, Ionic/Capacitor, Fabric.js, shadcn-vue, D3.js, Prismic, Strapi

Tools: VS Code, IntelliJ IDEA, Postman, Insomnia, Trello, Linux

LANGUAGES

Spanish: Native | **English:** Professional working proficiency (written and spoken) | **Italian:** Intermediate (written and spoken)
